PROFESSIONAL SUMMARY

Senior technical professional with over eleven years supporting enterprise software customers, resolving complex issues and translating technical concepts for technical and non-technical audiences alike. Combines that experience with hands-on full-stack and automation skills (Python, React, Node, AI), shipping live applications end to end. Known for clear communication, steady troubleshooting, and keeping the customer's experience at the center of every technical decision.

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML/CSS, Java, C++

Frameworks & Tools: React, Node.js, Express, Vite, Git/GitHub, GitHub Actions, REST APIs, JWT auth

Databases: PostgreSQL, MySQL, SQLite, MongoDB, Oracle

Cloud & Deployment: AWS, Azure, Oracle Cloud, Vercel, Render, Supabase

AI & Automation: Anthropic API, Python automation, Replit, Salesforce Ascend

Languages: English

EDUCATION

Master's Degree in Digital Forensics

Champlain College

Jan '16 — Aug '19 · Burlington, VT

Bachelor's Degree in Computer Science

University of Central Florida

May '10 — Jul '13 · Orlando, FL

EXPERIENCE

Business Analyst

University of Florida, Annual Giving & Donor Relations (Contract via Spherion)

May '26 — Jul '26 · Gainesville, FL

- Partnered with the team's data analysts to map manual, spreadsheet-driven workflows and build Python-based automation tools in Replit that handled the data preparation, transformation, and formatting behind them, reducing repetitive workload and freeing the analysts for higher-value analytical work.
- Developed a suite of internal automation tools in Replit using Python and AI-assisted development, replacing manual, spreadsheet-based steps with automated workflows that generated clean, consistent data for the team to load into Salesforce Ascend.
- Leveraged UF's HiPerGator high-performance computing platform across the majority of these projects, tapping significant compute capacity to run data processing and automation workloads that would exceed the limits of a standard local environment.
- Translated the requirements of non-technical partners into working technical solutions, gathering their needs, scoping them into clear specifications, and delivering automation that fit directly into the team's existing data and reporting processes.

Senior Technical Support Engineer

Oracle Corporation

May '16 — Sep '25 · Orlando, FL

- Managed post-implementation activities for 30+ enterprise deployments of Oracle E-Business Suite modules (Channel Revenue Management, Incentive Compensation), securing timely go-lives and cutting post-launch issues by ~27–30%.
- Led a proactive global initiative to develop automation tools that improved service request resolution efficiency, reducing average “time to resolution” by ~33% and increased support engineer productivity across a team of 100+ engineers.
- Facilitated monthly calls between management, technical support leads, and internal development teams.
- Executed product release testing for Channel Revenue Management and Incentive Compensation applications, identifying 20+ critical defects pre-release. Improved product stability, reducing post-release incidents by ~14%.
- Served as moderator for the My Oracle Support Community (MOSC) CRM Channel Revenue Management forum, managing 75+ user interactions, resolving inquiries, and maintaining high engagement and knowledge-sharing standards.

Technical Support Engineer

Oracle Corporation

Oct '14 — May '16 · Orlando, FL

- Resolved 50+ complex technical issues per quarter for a global Oracle E-Business Suite Channel Revenue Management customer base, maintaining 90%+ customer satisfaction and meeting strict SLA response and resolution targets.
- Conducted in-depth troubleshooting sessions via web conferences and phone calls, analyzing system behavior with customers, identifying root causes, and implementing solutions that improved resolution speed.
- Developed and executed 100+ SQL queries to analyze system data and identify root causes of customer issues, refining diagnostic accuracy and reducing escalation rates by ~15–25%.

Professional Services Engineer

Tourico Holidays / Hotelbeds

Jul '13 — Oct '14 · Altamonte Springs, FL

- Supported and contributed to the growth of Tourico Holidays' clients using XML-based API integrations and other featured optimizations. Established and maintained productive, strong business relationships with an established client base grossing \$200,000,000 per year.
- Acted as the primary technical point of contact for 15+ business partners and enterprise clients, distilling complex technical concepts into actionable insights while leveraging deep analysis of customer data to drive ~10–20% increases in partner revenue.
- Created and maintained a technical documentation website for the implementation of the Tourico Holidays' API. Documentation included best-practice methodologies, XML field definitions, an API term glossary, and recommended API method examples.
- Designed targeted SQL-based reports that transformed raw database records into structured client-facing analytics and internal dashboards, enabling partners and company stakeholders to identify booking and search trends, prioritize operational fixes, and streamline workflows for faster decision-making.

PROJECTS

Build Journal: LEGO Collection Tracker

[Live](#) | [Code](#)

A full-stack web app with user authentication, a Postgres database, and AI-powered build suggestions, built with React, Node/Express, and the Anthropic API.

What to Watch Before Avengers: Doomsday

[Live](#) | [Code](#)

A comic book-styled MCU viewing guide built in vanilla HTML, CSS, and JavaScript, featuring a custom design system and an interactive quiz.

WNBA Stats Tracker

[Live](#) | [Code](#)

Python, SQLite, and the balldontlie API, auto-refreshed daily via GitHub Actions to surface current WNBA season data on a live dashboard.

Snapchat Forensics, Champlain College

Aug '19

Collected, analyzed, and preserved Snapchat digital forensics data from a wide range of mobile device applications.

VOLUNTEERING

Course Instructor, Tech Sassy Girlz

Orlando, FL

Mar '18 — Apr '19

Mentored middle and high school girls pursuing STEM careers with Tech Sassy Girlz, a nonprofit focused on career readiness and hands-on learning experiences.

Head Coach, City of Orlando

Orlando, FL

Oct '17 — Dec '17
